

DIGEST #2 • FEBBRAIO 2022

ARTICOLI SULLA SIMULAZIONE PEDIATRICA PUBBLICATI A GENNAIO 2022

progetto grafico di **Sara Ligutti**
selezione articoli di **Marco de Luca**

MADE IN ITALY

Nucci A, Sforzi I, Morley-Fletcher A, Saffirio C, Bussolin L, Masi S, Weinstock P, de Luca M.

Quality Improvement Initiative Using Blended In Situ Simulation Training on Procedural Sedation and Analgesia in a Pediatric Emergency Department: Better Patient Care at Lower Costs. *Simul Healthc.* 2021.

- Available from: <http://doi.org/10.1097/SIH.0000000000000626>

Ricci S, Mobilio GA, Calandrino A, Pescio M, Issa E, Rossi P, et al. RiNeo MR.

A mixed-reality tool for newborn life support training. *Annu Int Conf IEEE Eng Med Biol Soc IEEE Eng Med Biol Soc Annu Int Conf.* 2021;2021:5043-6.

- Available from: <http://doi.org/10.1109/EMBC46164.2021.9629612>

OPEN ACCESS

Haynes J, Rettedal S, Perlman J, Ersdal H. A.

Randomised Controlled Study of Low-Dose High-Frequency In-Situ Simulation Training to Improve Newborn Resuscitation. *Children.* 2021;8(12):1-12.

- Available from: <http://doi.org/10.3390/children8121115>

Jeanmonod R, Rammohan G, Grimaldi M, Pester J, Stankewicz H, Patterson R, et al.

Resident comfort teaching and performing pediatric airway procedures after instruction using the Peyton method, standard simulation, or digital platforms. *Int J Acad Med.* 2021;7(4):226-32.

- Available from: http://doi.org/10.4103/ijam.ijam_51_21

Kłosiewicz T, Zalewski R, Szkudlarek W, Węglewska M, Purandare B, Puślecki M.

Quality of chest compressions performed by school-age children — a quasi-experimental simulation-based study.

Med Res J. 2021;6(4):295-300.

- Available from: <http://doi.org/10.5603/MRJ.a2021.0047>

Koff A, Burns R, Auerbach M, Lee B, Pearce J, Ciener D, et al.

Pediatric Emergency Medicine Didactics and Simulation (PEMDAS) Telesimulation Series: Hyperleukocytosis.

MedEdPORTAL J Teach Learn Resour. 2021;17:11205.

- Available from: http://doi.org/10.15766/mep_2374-8265.11205

Langevin M, Ward N, Fitzgibbons C, Ramsay C, Hogue M, Lobos A-T.

Improving Safety Recommendations Before Implementation: A Simulation-Based Event Analysis to Optimize Interventions Designed to Prevent Recurrence of Adverse Events. *Simul Healthc.* 2022;17(1):e51-8.

- Available from: <http://doi.org/10.1097/SIH.0000000000000585>

Lopez de Alda JX, Patel N, McNinch N, Ahmed RA.

A Blindfolded Pediatric Trauma Simulation and Its Effect on Communication and Crisis Resource Management Skills.

Cureus. 2021;13(11):e19484.

- Available from: <http://doi.org/10.7759/cureus.19484>

Mubeen K, Baig M, Abbas S, Adnan F, Lakhani A, Bhamani SS, et al.

Helping babies breathe: assessing the effectiveness of simulation-based high-frequency recurring training in a community-based setting of Pakistan. BMC Pediatr. 2021;21(1):555.

- Available from: <http://doi.org/10.1186/s12887-021-03014-2>

Rephaeli R, Gafanovich D, Shchors I, Weiser G.

Correction to: Can parental simulation improve neonatal CPR performance? A pilot study. Eur J Pediatr. 2022.

- Available from: <http://doi.org/10.1007/s00431-021-04360-0>

Stoner AC, Schremmer RD, Miller MA, Davidson KL, Pedigo RL, Parson JS, et al.

Simulation-Based System Analysis: Testing Preparedness for Extracorporeal Membrane Oxygenation Cannulation in Pediatric COVID-19 Patients. Pediatr Qual Saf. 2022;7(1):e510.

- Available from: <http://doi.org/10.1097/PQS.0000000000000510>

Szczerbik E, Kalinowska M, Święcicka A, Graff K, Syczewska M.

The impact of two weeks of traditional therapy supplemented with virtual reality on balance control in neurologically-impaired children and adolescents. J Bodyw Mov Ther. 2021;28:513-20.

- Available from: <http://doi.org/10.1016/j.jbmt.2021.09.007>

Ulumbekova GE, Kildiyarova RR.

User Experience of Training Pediatric Students on Interactive Simulator During COVID-19 Pandemic. Adv Med Educ Pract. 2022;13:27-33.

- Available from: <http://doi.org/10.2147/AMEP.S341665>

Xiang H, Shen J, Wheeler KK, Patterson J, Lever K, Armstrong M, et al.

Efficacy of Smartphone Active and Passive Virtual Reality Distraction vs Standard Care on Burn Pain Among Pediatric Patients: A Randomized Clinical Trial. JAMA Netw open. 2021;4(6):e2112082.

- Available from: <http://doi.org/10.1001/jamanetworkopen.2021.12082>

Yousef N, Moreau R, Soghier L.

Simulation in neonatal care: towards a change in traditional training? Eur J Pediatr. 2022;1-8.
