NOTSS - NON TECHNICAL SKILLS FOR SURGEONS

MASTERCLASS

CONTENTS

This is a one day course is for consultant surgeons and higher surgical trainees from all specialties who already have some basic knowledge of the role of Human Factors in surgical performance, such as completing the NOTSS in a Box training modules and who have an ongoing interest in surgical training and assessment. The non-technical skills which underpin safer operative surgery will be examined in detail with short talks, video simulated scenarios and small group discussions. At the end of the course participants will be able to understand the theories and research relating to adverse events in surgery and other high risk industries. They will be able to use the NOTSS system to observe, rate and provide feedback on behaviour in the operating theatre.

PARTICIPANTS OVERVIEW

The course is aimed at surgeons and medical residents who intend to improve their "non-technical" skills.
Language course: english
